

By Dr. Tolly Kamelia

If you only need the buying answer, the current Merybook print listing is the strongest clean ownership value in this snapshot. It is below the sampled new-print market, below rental, and below the sampled eTextbook price. The only cheaper number in the table is a used-copy offer, which carries a different condition tradeoff.

Current price comparison

Format / Seller	Price	Link
Print from Merybook	\$55.75	Check price
Amazon paperback	\$94.52	Check price
Amazon used	\$40.68	Check price
eCampus new print	\$94.35	Check price
eCampus semester rental	\$66.59	Check price
Amazon eTextbook	\$69.74	Check price

The price story is straightforward. If you are comfortable with a used copy, the lowest number in the sample is there. But among clean, ownable options, the current Merybook print listing is the strongest route. It beats rental and beats the sampled eTextbook, which is unusual for a clinical PT text.

What this book actually teaches

Neurologic Interventions for Physical Therapy is valuable because neurorehabilitation forces students to connect examination findings, motor learning, functional goals, and intervention reasoning rather than memorizing isolated techniques. A useful text in this area becomes a guide for case-based thinking, not just a source of definitions.

That is why this kind of book often grows in value during labs and clinicals. Students revisit intervention ideas after patient scenarios become more complex and after they start seeing how neurologic presentations change treatment choices. A print copy that

already holds their notes can become a real working reference.

Who should buy print and who should not

Buy print if you are in PT and expect to keep using neurologic rehab concepts in later courses, labs, or clinical placements. At the current prices, print is the stronger clean value route.

Choose used only if your goal is simply the absolute lowest ownership cost and you are comfortable with whatever condition the marketplace copy arrives in.
